

Tellus Power Unveils Electric Vehicle Charging Stations, DC Supercharger Stations, Solar Glass Car Roofs, and Vehicle Energy Storage Products at CES

Tellus Power is showcasing the industry's toughest built, high-performance, low priced, Networked EV Charging Stations.

Tellus is launching 500 DC Supercharger Stations and 1,000 EV Car Sharing fleet in Beijing.

Tellus will introduce next-generation Curved Solar Glass Roofs originally developed for the Fisker Karma, and built by Tellus-Asola Technologies, a leader in vehicle and building integrated solar glass. Additionally, Tellus will exhibit energy storage from Tellus-STGCON division.
