

Tellus Displays World's Toughest-Built, Low-Cost Networked EV Charging Stations at CES

Las Vegas, NV January 5, 2017

Tellus Power will be unveiling the electric vehicle industry's most rugged and affordable EV charging stations at the Consumer Technology Association (CES) conference in Las Vegas on January 5, 2017. The charging stations are ideal for drivers in public spaces such as workplaces, parking lots, retail shopping centers, hotels, utilities, government, education, and healthcare.

Tellus' state-of-the-art EV charging stations are built with high-strength, 1/4" marine-grade, corrosion-resistant aluminum. They are also cost-effective due to the fact that the lower third of the housing can be filled with concrete, eliminating protective bollards and saving up to \$500-\$700 per station. Unlike similar charging stations, Tellus' models can charge two vehicles simultaneously. The dual port Level 2 chargers deliver a full 7.2 kW charge to both vehicles at the same time, reducing charge time by 50 percent.

Tellus' user-friendly and secure network offers the fastest first-time activation for new drivers with no 800 number to call - drivers only have to enter their cell number, get a text message and are able to start charging. The Tellus network also offers mobile advertising opportunities by allowing advertising messages to be sent directly to driver's smartphones.

Other features include free first-year network license, field swappable components, a weatherproof NEMA 3R enclosure, 18' charging cord, and two-year warranty. Tellus EV charging stations are made in California, USA.

About Tellus:

Tellus Power is an energy technology company listed on the Beijing stock exchange (Tellus Power Green electricity stock code: 430087; STGCON - stock code: 834855). The conglomerate incorporates worldwide brands including STGCON Energy and Asola Technologies.

Tellus Power offers a wide range of products such as Tellus Level 2 and DC fast charging stations, along with Tellus cloud-based charging networks and software. Asola Spheric™ curved solar glass car roof tops, Asola building-integrated solar glass, STGCON energy storage products, Tellus EV rideshare services, and Tellus electric vehicle sales and leasing. Tellus global sales, manufacturing, and service centers are located in California, Germany, and China.
